

Subtract Unlike Mixed Numbers

Fill the blanks with the numbers that solve the subtraction expression correctly. Take help of the solved example.

1

$$\boxed{5} \frac{\boxed{2}}{\boxed{5}} - \boxed{2} \frac{\boxed{6}}{\boxed{8}} = \frac{\boxed{}}{\boxed{}} - \frac{\boxed{}}{\boxed{}}$$

$$= \frac{\boxed{}}{\boxed{}} - \frac{\boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}} = \boxed{} \frac{\boxed{}}{\boxed{}}$$

2

$$\boxed{8} \frac{\boxed{1}}{\boxed{2}} - \boxed{7} \frac{\boxed{1}}{\boxed{3}} = \frac{\boxed{}}{\boxed{}} - \frac{\boxed{}}{\boxed{}}$$

$$= \frac{\boxed{}}{\boxed{}} - \frac{\boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}} = \boxed{} \frac{\boxed{}}{\boxed{}}$$
