

## Multiplication Expression of Non-Unit Fractions

Form a multiplication expression with the help of the addition expression.

1. 
$$\frac{\boxed{1}}{\boxed{5}} + \frac{\boxed{1}}{\boxed{5}} + \frac{\boxed{1}}{\boxed{5}} = \boxed{\phantom{00}} \times \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$

2. 
$$\frac{\boxed{1}}{\boxed{2}} + \frac{\boxed{1}}{\boxed{2}} + \frac{\boxed{1}}{\boxed{2}} + \frac{\boxed{1}}{\boxed{2}} = \boxed{\phantom{00}} \times \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$

3. 
$$\frac{\boxed{1}}{\boxed{3}} + \frac{\boxed{1}}{\boxed{3}} + \frac{\boxed{1}}{\boxed{3}} + \frac{\boxed{1}}{\boxed{3}} + \frac{\boxed{1}}{\boxed{3}} = \boxed{\phantom{00}} \times \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$

4. 
$$\frac{\boxed{1}}{\boxed{9}} + \frac{\boxed{1}}{\boxed{9}} = \boxed{\phantom{00}} \times \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$
